# Typography - accent line

---

The accent line is primarily used for headings and callout text. The accent line can be any colour from the colour palette on page 6.

The line length should extend to x2 the cap line height of the accompanying heading text, with a weight of 3px.

The space between the heading and the accent line is equal to the line height of the cap line. Any following text should also be the same distance.

**Lorem ipsum dolor  
sit amet**

Lorem ipsum dolor sit amet,  
consectetuer adipiscing elit sed diam  
nibh

**“This is a quote style example  
lorem ipsum dolor sit amet,  
adipiscing elit sed diam  
nonummy nibh”**
