

**PRINCIPLE has
Recruited**

4182

Participants!

Reminder: Sentry vs Secure

For checking eligibility, there are two versions of Sentry: **Sentry & Secure**.

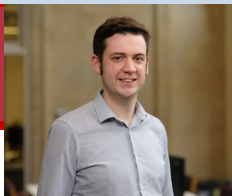

- * **Sentry:** Original system for participants using your unique practice link.
- * **Secure:** Newer version for participants registering via our website etc.

Both systems require **separate usernames and passwords** which will have been emailed to you upon your initial set up for both of these systems.

Please do get in touch if you cannot log in to either of these systems.

Meet the Team!

Jared Robinson—Trial Manager

Why did you get into research?

I studied Human Biology at University and have always been interested in health. Research can make a big difference to people's lives so it can be very rewarding at times. I used to work in a lab but I prefer the variety that comes with clinical trials.

What's your favourite thing about working at the CTU?

Working with a great team of friendly and hard working people, and getting involved on a wide range of different research topics across primary care.

What have you learnt about working on Principle?

I've learned to learn quickly! It's such a fast-paced and evolving trial that you need to adapt to new challenges every day.

PRINCIPLE and COVID-19 Vaccinations

Please note that all participants of the PRINCIPLE Trial are still eligible to receive their COVID-19 vaccine, and should continue to book their appointment, once invited (if they wish).

Participation does not deny access to their usual standard of care or treatment.

We have more than 1000 practices working with the PRINCIPLE Trial across the UK, and recruited almost 4000 participants! Just a small increase in recruitment and outreach from each practice can make a huge difference.

TOP RECRUITING CRNs (participants randomised per region to date)

1. North West Coast
2. North East & North Cumbria
3. Yorkshire & Humber
4. Thames Valley & South Midlands
5. West of England
6. West Midlands
7. South West Peninsula
8. East Midlands
9. Eastern
10. Greater Manchester

Time is key

We would kindly like to ask that any patient eligibility checks requested by the team be returned as quickly as possible.

Small delays can lead to patients missing out on participation, which we would like to avoid as much as possible.
