

Weekly Newsletter - 18th June 2021

**PRINCIPLE has
recruited
5088
Participants!**

Long term effects of COVID-19

We are also carrying out research to understand the long term effects of COVID-19 on our participants.

Participants have been asked to complete a long-term follow up questionnaire via email at 3, 6 and 12 month intervals.

We have had a great response so far and the Trial Team are now following up on those participants yet to respond, in order to gather more data on the long-term effects of COVID-19.

Please continue to support recruitment in any way you can - **PRINCIPLE is still open to those who have received a COVID-19 vaccine.**

Location of participating GP practices below:

#Red4Research

Meet the Team

Joris de Henau - Trial Administrator

Why did you get into research?

I got into research because I like to find out which treatments actually do (and don't) work; it is different from having an opinion about a piece of music!

What's your favourite thing about working at the CTU?

As my colleagues are truly fabulous, I must mention them as my favourite aspect of working here. And cake.

What have you learnt about working on PRINCIPLE?

I have learnt from working on Principle how to be part of a Big Team, and about the public's enthusiasm to take part in a trial.
